***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, 21-37 drawn to an energy converter, classified in class 310, subclass 306.

II. Claims 19-20, 38-42, drawn to a heat pump, classified in class 62, subclass 3.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility as an electrical generator without the voltage bias means between the emitter and the collector, and the invention of Group II has separate utility such a heat pump without the manipulating means of Group I. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification; and because the search required for Group I is not required for Group II, the restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
